TRP International, LLC.

LETTER FROM THE PRESIDENT

Since 1992, TRP International has served the light and medium-duty trailer industry. The TruRyde brand of axle, suspension, and frame components is known for high value, consistent quality, and reliability.

TRP combines domestic state-of-the-art machining and assembly capabilities with extensive global sourcing to provide cost-effective solutions and on-time delivery. This version of our catalog represents a culmination of years of hard work in bringing together a complete line of components for RV, utility, and marine trailers with axle capacity ratings from 2,000 pounds up to 16,000 pounds.

The catalog features numerous new products, denoted by the NEW symbol. Please consult your TRP Account Executive for pricing, availability, and further information on these and all items in this catalog.

We are deeply grateful to our customers, vendors, and employees for their ongoing support, without which our success would not be possible. We value these relationships and remain committed to being loyal and dedicated partners well into the future.

We appreciate your interest in our axle, suspension, and frame components catalog and look forward to speaking with you about your product needs. The TRP International team is ready to serve you, our valued customer.

Sincerely,

Chris Mileger

OUR STRATEGY

MISSION STATEMENT

Our mission is to provide our customers with an expansive line of quality products distributed on schedule, at competitive prices, with responsive and professional service.

VISION STATEMENT

The TRP group of companies will be a leading global supplier of axle, suspension, and other frame and trailer components to a variety of ground transportation equipment industries by providing excellent products and services to our customers, challenging opportunities for our employees, and positive contributions to our communities.

QUALITY POLICY

TRP International, LLC. is committed to using proven quality management principles to safely produce and source quality products and services that exceed customer expectations for value, performance, and reliability through continual improvement of our business systems.

OUR CORE VALUES

PEOPLE MATTER

People-oriented beliefs and values. Treating everyone with dignity, respect, understanding, and acting without prejudice. Offering mentorship, development, and empowerment.

CUSTOMER FOCUSED

Serving both internal team members and external customers' needs with a commitment to exceptional and timely support.

DOING RIGHT

Commitment to honesty, integrity, trust, and accountability. Decisions and actions benefiting our people, our customers, our vendors, and our communities.

RESULTS DRIVEN

Taking care of our people and partners in the areas of quality of life, service, and products. Focused on accurate, on-time delivery. Working with a proactive and positive attitude.

OUR EXPERTISE

ENGINEERING

Our engineering staff has experience in various design and manufacturing environments including leaf springs, tapered roller bearings, closed-die forgings, metal stampings, and CNC machining. Our resources include professional mechanical, quality, and metallurgical engineers. With these skills, we are striving every day to improve the overall cost and quality of the products we offer.

MANUFACTURING

The TRP companies take pride in the capabilities and efficiency of each piece of equipment used to manufacture our products. We strive to incorporate lean principles to keep costs down in our production facilities. Each facility takes pride in shipping quality products and maintains a quality system that builds the framework for verifying that we meet customer specifications.

INTERNATIONAL TRADE

With over three decades of international trade experience and qualified TRP personnel working through liaison offices in Italy and China, we have the expertise necessary to communicate, consult, coordinate and execute the many facets of importing products to North America from abroad.

CUSTOM FORGING DIVISION

TRP International, LLC. established a business relationship with Ghioni & Valaperta, an Italian forging company, in 1992. Ghioni & Valaperta has specialized in custom closed-die steel forgings for over 50 years and provides forgings and finished components to companies like GKN, Stellantis, Audi, and Volkswagen. Through this relationship, TRP can access world-class forgings that combine unique technology and equipment with highly skilled employees.

Combining its sales, engineering, and distribution forces, TRP supplies forgings of unparalleled quality to its customers in North America. Always looking to increase its value-added capabilities, TRP acquired a production machine shop that now operates at TRP corporate headquarters in Elkhart, IN. The machine shop is equipped with highly capable, state-of-the-art machinery allowing TRP to consistently improve the quality of each component produced.

PRODUCTION MACHINING

TRP's in-house production machine shop in Elkhart, IN., is staffed with a team of highly experienced machinists who specialize in machining various axle and suspension components for the light and medium-duty trailer industry. We take immense pride in the capabilities and efficiency of each piece of equipment used to manufacture our products.

Our dedication to incorporating lean principles to keep costs down in our production facilities is matched only by our unwavering commitment to quality. Each TRP facility is committed to shipping only the highest quality products and maintains a robust quality system that ensures we consistently meet and exceed customer expectations.

DISTRIBUTION

With state-of-the-art technology for order processing and fulfillment combined with strategically located distribution centers, we can effectively serve the requirements of customers across the U.S., as well as Canada and Mexico. Our constant attention to logistics and evaluation of carrier performance and pricing, assures the most efficient, cost-effective shipping methods resulting in faster delivery and lower total product costs.

TRP AGRICULTURAL DIVISION

Since 2011, TRP Agricultural Division has been a reliable supplier to the agricultural market, offering a wide range of components such as spindles, hubs, drums, brakes, bearings, seals, dust caps, and fasteners. We have recently expanded our product line to include jacks and couplers from the high-speed business.

Our commitment to customer satisfaction is evident in our extensive inventory of the most popular items and our ability to work with customer-designed products. By leveraging our domestic manufacturing capabilities, we provide a broad range of high-quality and competitively priced components.

EMCO INDUSTRIES

ABOUT EMCO INDUSTRIES

At EMCO Industries, we eat, live, and breathe spring steel. Manufacturing and distributing spring steel is our passion, which shows in our customer satisfaction.

With over thirty years in business, we have become well known for our complete line of leaf springs, agricultural components, and other heat-treated products. Our leaf springs can be found on heavy-duty trailers, RVs, boat trailers, open and closed utility trailers, specialty vehicles, agricultural equipment, and many other applications.

OUR HIGH-QUALITY PRODUCTS

EMCO Industries is a different kind of leaf spring manufacturer. We have the product knowledge and know-how to solve many spring-related problems, and we are the only domestic manufacturer with a company-owned facility in China. This allows us the flexibility to provide our customers with the best solution possible while maintaining control during

the entire process, from receiving your order until the product reaches your dock.

We have built our business on knowledge, continuous improvements, innovation, globalism, and professionalism. At the core of our company's approach lies lean manufacturing. This commitment drives us to continually seek opportunities to reduce expenses and enhance quality.

HEADQUARTERS AND FACILITIES

Our 95,000 square-foot manufacturing facility in Claremore, Oklahoma is centrally located in the U.S., minimizing freight charge and improving delivery times.

Our 200,000 square-foot Chinese manufacturing facility located in the Hebei Province, near Tianjin's port offers great access to ship products to the U.S., or wherever our customers require them. Our Chinese facility allows us to offer a blended supply solution to our customers.

In 2016, after merging with TRP International, LLC. with warehouse and distribution facilities in Elkhart, Indiana and Mesquite, Texas (Dallas county), together we are the ONLY spring supplier that can honestly say we have the solutions for your leaf spring needs.

UNWAVERING BACKBONE

From the earliest days of modem hauling trailers to their horse-drawn wagon forbearers, one component that has remained a constant is the highly functional and reliable leaf spring.

Trailers made for hauling come in three varieties: light-duty, medium-duty, and heavy-duty. Whatever size or type of load arc hauling, one thing they all have in common is that they need the right kind of suspension. Everything literally rides on the suspension. Leaf spring suspensions stand out as both reliable and cost-effective. They have been serving the hauling industry for years, with a proven track record.

THE CRAFTSMANSHIP

Manufacturing leaf springs correctly is a meticulous operation. EMCO begins with automotive-grade, high carbon specialty steel. The material is then specifically processed to create EMCO's leaf springs.

EMCO has advanced heat-treating capabilities and the steel undergoes rigorous preparation for its final purpose. It's the quality of steel and the sophisticated heat-treating processes that is at the heart of our leaf spring quality.

EMCO'S highly-automated operations seamlessly produce hundreds of thousands of leaf springs every month, meeting the demands of our customer base. It's this quality and capacity that has made EMCO the undisputed leading supplier of springs to the light-and medium-duty trailer market which has driven the expansion into the heavy-duty, 22.5K axle leaf spring segment.

Torsion Axle Components

2,000 LB. - 10,000 LB.

Easy installation with less overall maintenance. Torsion axles are ideal for minimizing road shock. For use on cargo, marine, agricultural and multi-use trailers. The rubber cord absorbs travel noise, creating a quiet, smoother ride than sprung axles and serves as extra protection for your cargo. Use with electric, hydraulic or disc brakes.

We offer solid steel inner bars, forged torsion arms with various starting angles for correct trailer height, precision machined steel spindles, and rubber cords for 2K to 10K axles.

FROM THE FOUNDER

At TRP International, we understand that partnerships are like puzzles—each piece is vital in completing the bigger picture. Since 1992, we’ve been helping businesses like yours find the right pieces to build success, offering practical solutions designed to help you grow and thrive.

With three strategically placed warehouse locations across the country and an extensive inventory of trailer parts, we ensure fast, reliable service to meet your needs. From small components to large orders, we’re committed to keeping your business moving.

We’re also proud to partner with our sister company, EMCO Industries, the leading domestic leaf spring manufacturer. EMCO specializes in high-quality, AMERICAN-MADE leaf springs and provides dependable trailer and suspension systems solutions.

Additionally, our state-of-the-art machining facility and engineering department in Elkhart, Indiana, allow us to offer custom manufacturing and design services. Whether you need a unique part or modifications to an existing product, our team is ready to collaborate with you.

At TRP, we believe every connection matters—whether with our long-time customers or those new to the industry. As the trailer parts landscape evolves, we’re here to ensure you have all the pieces you need to complete your puzzle and succeed.

At TRP International, we take pride in leveraging our extensive network of global supply chain partnerships to bring unparalleled value and reliability to our clients. By sourcing directly from our trusted partners, we provide top-quality products, cutting-edge solutions, and seamless logistics. Our commitment to building strong, collaborative relationships enables us to deliver tailored services that meet your unique needs, helping your business thrive in a competitive market. With TRP International, you gain more than a supplier—you gain a trusted partner dedicated to your success.

Sincerely,

Vince Scott

Brake Actuators

ELECTRIC-OVER-HYDRAULIC

DeeMaxx/Deutsche Hydrapro™ developed their Hydrapro Electric Over Hydraulic (EOH) Brake Actuator with a global German hydraulic pump manufacturer with over 90 years of experience providing innovative hydraulic drive and control technologies.

Our electric-over-hydraulic brake actuator’s quality and simplicity gives you the necessary reliability for a trailer braking system. In addition, it has a superior response time that delivers shorter stopping distances, which gives the driver confidence while towing. DeeMaxx is the only company that offers 360° brake line position connection,

Brake Actuators

ELECTRIC-OVER-HYDRAULIC

DeeMaxx/Deutsche Hydrapro™ developed their Hydrapro Electric Over Hydraulic (EOH) Brake Actuator with a global German hydraulic pump manufacturer with over 90 years of experience providing innovative hydraulic drive and control technologies.

Our electric-over-hydraulic brake actuator’s quality and simplicity gives you the necessary reliability for a trailer braking system. In addition, it has a superior response time that delivers shorter stopping distances, which gives the driver confidence while towing. DeeMaxx is the only company that offers 360° brake line position connection,
